

Job Title: Senior Developer, Blockchain

Job number: 130-17/18

Location: Regina, Saskatchewan

Closing date: September 8, 2017

Division: Information Technology

Language required: English

Term: Permanent

Experience as full stack developer required

Work on emerging technologies, build proof of concepts and collaborate with business teams to identify the right solution.

What you'll do:

- Lead blockchain projects, including proof of concepts; monitor blockchain technologies
- Help conceptualize use cases by sharing your blockchain expertise
- Recommend architecture and technologies based on the use cases

What we're looking for:

- Innovative problem-solver with strong critical thinking skills
- Technical leader who can coach and mentor
- Collaborator who excels in a fast-paced environment
- Creative thinker who learns by experimentation

What you'll need:

- A degree in computer science or engineering and at least five years of related full stack development experience (or equivalent combination of education and experience)
- Hands-on experience building and releasing blockchain applications or POCs

Build a career with one of Canada's top employers

Thrive in an inclusive culture of teamwork, strong leadership and respect. Here, diverse people pull together to achieve goals that are challenging and rewarding. You can learn and grow in an environment of acceptance and accountability. Come meet FCC.
