Front-end Developer

Yardi Canada is looking for a skilled front-end developer to join our team in Saskatoon, SK building a web application that has a very real impact on global energy conservation. If you want to work on a project that has tangible, socially responsible benefits, make a move and send us your resume. Applicants should be passionate about their craft, committed to continuous improvement, and excited to join a friendly and diverse company culture.

Our ideal candidate has an advanced knowledge of:
- JavaScript, HTML5, CSS
- AngularJS
- Charting libraries like Highcharts, D3, and Chart.js
- Building and optimizing front-end-heavy applications
- Generators and build tools like webpack, gulp, and Grunt

Bonus marks for experience with:
- ES6 modules, promises, compilers (e.g. Babel), and classes
- JavaScript unit testing frameworks
- React
- npm
- Continuous integration

As a programmer at Yardi you will:
- Work on tightly knit, 4–8 person, cross-functional development teams
- Collaborate directly with a business analyst for requirements and demos
- Specialize in front-end development but still contribute to the full stack from database through to deployment
- See your work go live to production at regular intervals (1–2 weeks)

Email your resume to Saskatoon.DEVcareers@yardi.com to introduce yourself to our team.

Yardi Canada Ltd. is a successful software company with a proven history of growth and market leadership in the multi-billion-dollar global commercial real estate industry.
