

## Quality Assurance Specialist

Yardi Canada is looking for a skilled QA Specialist to join our team in Saskatoon, SK building a web application that has a very real impact on global energy conservation. If you want to work on a project that has tangible, socially responsible benefits, make a move and send us your resume. Applicants should be passionate about their craft, committed to continuous improvement, and excited to join a friendly and diverse company culture.

As a QA Specialist, you will:

- Work directly with the development team to evaluate and test enhancements and new features using systematic exploratory and automated testing
- Help improve and enhance system functionality, reliability, performance and scalability
- Work with the Scrum Master to help build out acceptance criteria for stories
- Execute manual test cases to verify that development stories meet all required acceptance criteria
- Contribute to the full software development life cycle
- Identify common issues and contribute to process improvements
- Make suggestions on improving ease of use and software quality
- Perform release verification testing

Our ideal candidate has:

- Strong ability to identify problem areas and understand how users may break the software
- Experience with manual exploratory testing
- Experience with Selenium
- Experience writing test scripts in Python
- Proven analytical, diagnostic, and decision-making skills
- General knowledge of enterprise web application architecture, you should understand how the software you're testing works.

Bonus marks for:

- Exposure to testing products that have been developed in JavaScript, .NET, and Java
- Two to five years of experience in web-based software and/or quality assurance with working knowledge of a variety of quality testing tools and systems such as Selenium, Watir, NUnit, QUnit, JUnit, Cucumber, or Robot Framework

Email your resume to [Saskatoon.DEVcareers@yardi.com](mailto:Saskatoon.DEVcareers@yardi.com) to introduce yourself to our team.
