Job Title: Senior Developer (Data and Analytics)

Job number: 208-17/18
Location: Regina, Saskatchewan
Closing date: November 24, 2017
Division: Information Technology
Language required: English
Term: Two positions; One-year term

Data structure, visualization and analytics expertise required
Join our Data & Analytics team and work on emerging technologies. You'll build proofs of concept using internal infrastructure and data, and work with technology and business teams to find the right solution.

What you'll do:
- Lead corporate data and analytics projects
- Design and develop effective POCs around visualizations and dashboards
- Help conceptualize various use cases
- Leverage various high-value applications for the technology

What we're looking for:
- Innovative analytic developer with demonstrated design expertise
- Critical thinker with natural intellectual curiosity and strong analytical skills
- In-depth understanding of statistical modelling, data visualization and analytics
- Proven leader able to influence and explain value from the customer's perspective
- Relationship builder who thrives in a fast-paced, collaborative environment

What you'll need:
- Post-graduate degree in computer science, mathematics or engineering and at least four years of related experience (or equivalent combination of education and experience)
- Experience with design, data structure, visualization and algorithms

Build a career with one of Canada's top employers
Thrive in an inclusive culture of teamwork, strong leadership and respect. Here, diverse people pull together to achieve goals that are challenging and rewarding. You can learn and grow in an environment of acceptance and accountability. Come meet FCC.
