Software Developer II – Matrix team

Yardi Canada seeks to add full-stack .NET developers to our growing team in Saskatoon responsible for a comprehensive market intelligence platform aiding real estate investors making business decisions in the multi-family and commercial space.

This role handles large data sets within our existing enterprise application. You will develop the UI, reporting, and analytics components for our customers. If it excites you to work on a collaborative, agile team building software with a wide-reaching impact, we invite you to come join us.

You need 3-5+ years' experience with:
- .NET (VB or C#), HTML, CSS, JavaScript, SQL
- N-tier application architecture
- Web services (REST, JSON)
- Test driven development and pair programming

Bonus marks for expertise in:
- Refactoring techniques and tools like ReSharper
- SQL performance tuning
- Software design patterns and clean coding

As a programmer at Yardi, you will work on a tightly knit, 10-member, cross functional dev team. You will contribute to all aspects of product development from the database right up to the UI, including build management and deployment. A product owner will work directly with the team on story development and demos. You will get to see your work go live to production every couple of weeks.

Email your resume to Saskatoon.DEVcareers@yardi.com to introduce yourself to our team.

From a small software startup focused on quality software and customer satisfaction, in four decades Yardi has grown into a global corporation with offices worldwide. The key to our longevity and stature is the importance we place on relationships – both outside and inside the company. Our employees are our most valuable asset. We empower, encourage, and challenge them so that, together, we can provide our clients with the superior products and service they have come to expect. We also believe it is vitally important to contribute to the health and well-being of our community, whether by volunteering time and energy to worthwhile causes or providing financial support to advance humanitarian goals.
